Many thanks for forwarding my battered pencil to which I am inordinately sentimentally attached.

Barring unforeseen developments, the November 16 date for the meeting of the Soviet group and my talk to [redacted] members is agreeable.

25X1A5a1

I should like to throw in some observations on Soviet achievements in scientific education; so in billing the talk you might appropriately call it, "Soviet Economic and Technical Developments." I shall have a few charts as you may remember so would appreciate an easel and pointer.
